We know finding a qualified and dependable workforce is the most important ingredient in your company's success. We also know you don't have time to go to a variety of places to find all the workforce development services your company needs. That's why the Kentucky Skills Network exists—to provide efficient, quality and seamless workforce services and resources.

The Kentucky Skills Network approach is pretty simple: we identify your company's specific needs, customize flexible recruitment and training solutions and implement quality services in a timely fashion. Our goal is to identify, determine and deliver solutions-based services for every client we serve.

If your company is new to Kentucky, expanding here or simply looking to upgrade the skills of your existing employees, the Kentucky Skills Network will help you with everything from hiring to providing job screening and training. The Kentucky Skills Network also provides flexible grant funding to offset the costs of a variety of in-house training needs.

### Here are a few additional ways we connect Kentucky companies with smart workforce solutions:

- Labor Market Research and Information Services
- Tax Credits for Training Incentives
- Free OSHA and Safety Training
- Registered Apprenticeship and Pre-Apprenticeship Training
- Industry Partnerships and Employee Pipeline Development

### Top Industries Served by the Kentucky Skills Network

The Kentucky Skills Network is a partnership of dedicated workforce professionals from the Cabinet for Economic Development, Kentucky Career Center, Labor Cabinet and the Kentucky Community & Technical College System. By working together, we can provide solutions-based services for you.

### Recruitment & Job Placement

The Kentucky Skills Network matches qualified workers with your company's needs. Through the Kentucky Career Center – TENCO Region, the Kentucky Skills Network can administer applications and screen applicants for the initial start-up of a new company, company expansions, seasonal hiring, or just to fill vacant positions as they occur. We can tailor - according to your needs - recruitment activities such as posting open jobs, providing labor market information, organizing hiring events, administering skills assessments, conducting interviews and pre-employment training.

### Training Incentives

Through the Cabinet for Economic Development and the TENCO Workforce Investment Board, the Kentucky Skills Network provides incentives as reimbursable grants and tax credits for classroom training, on-the-job training, tuition and certification training, train-the-trainer travel, and entry level and skills upgrade training. Kentucky has resources that allow flexible and customizable training specific to company needs.

### Customized Training

The Ashland Community & Technical College (ACTC) and Maysville Community & Technical College (MCTC) are the TENCO regions primary provider of workforce education, delivering programs and services that address the needs of both businesses and workers. ACTC & MCTC provide anytime, anyplace customized training and support services for business and industry. ACTC & MCTC training can often be provided at a reduced cost through grant funding. Through the KCTCS-TRAINS grant, companies receive funding to assist with the cost of providing workforce training and assessment services to current, as well as potential, employees.

### OSHA & Safety Training

To ensure the Commonwealth's workplace is a safe and healthy environment, the Kentucky Skills Network utilizes [www.laborcabinetetrain.ky.gov](http://www.laborcabinetetrain.ky.gov) to provide free certifiable courses available in both safety and health.

### Industry Partnerships & Training Consortia

To help prepare individuals for tomorrow's jobs or to help companies join together to decrease the cost of job training, industry partnerships and training consortia in the TENCO region exist to collectively address the region's workforce needs.

- Maysville Jobs Club
